

3 Axis Simultaneous Vibration Test Systems

Aiming at Reproducing More Realistic Vibration

Only one technology for multi-axis excitation

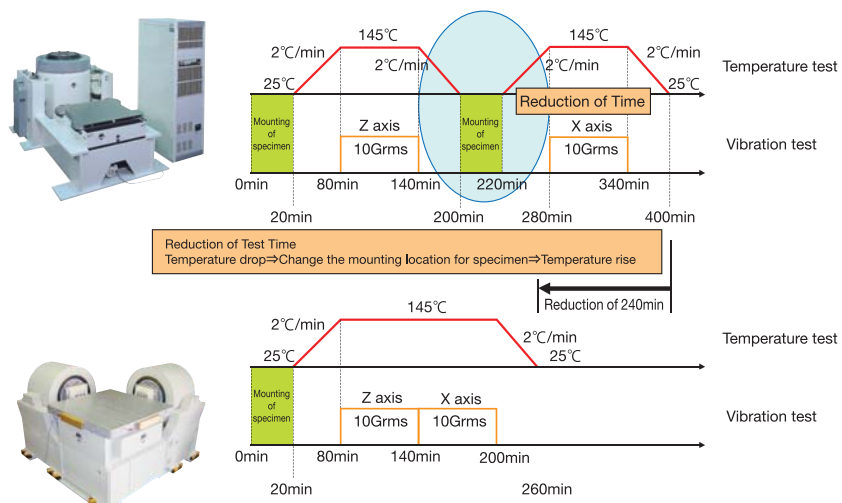

ICCU Bearing (Integrated Cross Coupling Bearing Unit)

(Japanese Patent No.2860745 U.S. Patent No.5549005)

IMV's unique bearing system makes 3 axis simultaneous movement achievable. ICCU is a patented technology developed by IMV for three axis simultaneous excitation.

Reduction of the test time

Reproduction of Failure Mode
